Timeless Serum corrects fine lines and wrinkles. Beech Bud Extract stimulates cell renewal, thus promoting cell regeneration. Fruit acid depots encapsulated in a lamellar structure refine the pores and deliver an intensive dose of moisture to the skin. The complexion appears even, visibly smooth and youthfully radiant. Timeless, timelessly beautiful.

Highlight Ingredients

Beech Bud Extract

Extract of young beech shoots, rich in vitamins, amino acids, lipids, minerals and secondary plant substances (e.g. polyphenols) which, when put together, develop an impressive synergy. This natural power-pack of active ingredients invigorates the skin's metabolic processes, e.g. the oxygen content of the cells, cell regeneration and the natural protective mechanisms. In this way it effectively reduces premature skin aging for a smooth and radiant complexion.

AHA Refine System

Lamellar-bound fruit acid content for a controlled peeling effect in a mild dose. Stimulates skin renewal and refines.

Classic Hyaluron

High-molecular hyaluronic acid, biotechnologically obtained. It forms a moisturizing film, which lies on the surface of the skin and ensures an instantly smoothing and intensively moisturizing effect.

Soft Focus Pigments

High Tech Pigments (mineral and/or synthetic), which visually minimize lines and wrinkles by light refraction and make for a photoshop effect.

Please note: The information about the active ingredients refers only to the individual substances we use. Properties and effects cannot be assigned generally to products or product groups, as the range of effects of a product is heavily influenced by the synergies between all basic substances and ingredients.
